

DYNAMIC SOLUTION STRUCTURING® (DSS®)

While overcoming organizational barriers is a complex process, it can be done using internal knowledge and resources. The expertise and experiences of employees play a key part in the development of these sustainable solutions. MANAC developed a unique methodology that guides and supports this internal process to controlled and sustainable acceleration.

WHAT IS DSS®?

Dynamic Solution Structuring® (DSS®) is the quickest path to develop sound solutions for your entrepreneurial challenges. The method systematically guides the participants and maximizes the use of your employed resources. The results obtained are shared by all participants and level their knowledge.

HOW DOES DSS® WORK?

DSS® uses the existing but dispersed knowledge of everyone involved. Effective and viable solutions to strategic and operational challenges are derived in record time. This interactive group method allows for creativity and innovation - which would be limited in smaller teams. Shared enthusiasm for the collective progress and incentive for the upcoming implementation are additional benefits. It creates a common and broader view through different perspectives.

WHAT CAN I USE DSS® FOR?

DSS® can accommodate multiple topics simultaneously. The method is easily scalable - use a large group of up to 160 participants to work through various topics or have a small core team working on one specific issue.

Management Accelerated successfully applies the DSS® method with challenges relating to:

- Identification of organizational barriers and development of relevant solutions
- Development of business mission and organizational strategy
- Reflections on change management and organizational culture
- Idea generation for effective innovation
- Identification of opportunities for process improvement and reengineering

WHAT IS THE VALUE OF DSS®?

This MANAC approach focuses on the generation of creative, practical ideas with a high degree of intrinsic motivation and acceptance by the participants. The close collaboration ensures a strong buy-in and shares knowledge and experiences across the participants. The related satisfaction and enthusiasm for the results transfers into a drive for successful implementation.

If you want to accelerate the work of your team and are interested in our MANAC DSS®, please contact us. We look forward to working with you.
